

A Superior AI for Law Firms

Supio is a legal AI built for personal injury and mass tort data to help provide crucial insights at the most critical moments in their case, delivering the best outcomes and winning more cases.

Get standardized care across all of your cases, so you can deliver more to your clients:

- **Uncover crucial evidence and better serve your clients**
 - An interactive AI chatbot to uncover missed diagnosis or untreated symptoms to ensure your clients get the care they need
 - Case critical information at your fingertips and searchable within seconds
 - A legal AI that can be trusted...even in court!
- **Automate legal outputs at human-like accuracy**
 - Perfected Demand Letter Package with highlighted discrepancies, pre-built exhibits, calculated damages and liabilities
 - Plaintiff Fact Sheets and quick summaries to easily highlight when or where you have a case or do not
 - Medical chronologies that are categorized, filterable, searchable, and summarized with direct links to where information is found
- **Deep dive analysis**
 - Compare statements in depositions and witness testimonies
 - Find contradictions in expert reports
 - Uncover discrepancies in filterable, searchable, and summarized with direct links to where information is found

Quickly and easily manage medical billing for clients

Paralegals no longer have to pour through medical bills to determine if they are related to the client's injuries or ensuring that they are complete and up to date. Supio matches medical bills with all medical visits and flags any missing records that need to be recovered.

Supio helps paralegals easily review medical bills to identify discrepancies, such as duplicate charges, incorrect billing codes, or charges unrelated to the injury, flagging them for further review.

Empowering Your Law Practice

Supio empowers you to see the big picture about your cases and the ability to find the needle in the haystack to case understanding. Our AI redefines how you understand your data, providing clarity and precision at every level. You can query our AI and find:

➤ Weaknesses in a case

Whether it's a witness testimony, previous injuries, or discrepancies in case details...the AI will find them.

➤ Specific information within 1000s of documents

With every query, you will have links to where that information was found so you can have a better understanding of what is being referenced for your case.

➤ Contradictions or comparisons of documents

With deep dive analysis, you can uncover where there may be contradictions in statements or compare testimonies in expert reports.

➤ Quick summaries

Whether it is a phone call with an insurance adjuster or arguing a claim in court, you can find details and quick summaries in seconds.

“Supio helps me win my cases! Supio expedites mundane tasks that inhibit your ability to focus on the legal analysis and the deposition and mediation and trial preparation that's instrumental to winning a case.”

Ryan McCollum,
Attorney at Whitley Law

An AI you can trust

A legal AI software that was purpose-built with superior LLM* technology and the highest security standards.

Committed to data security and privacy

Supio uses continuous monitoring and encryptions, ensuring sensitive data and customer information are protected. With data centers in the US, Supio maintains security controls and practices compliant with HIPAA and GDPR.

Works with your tech stack

Supio works with Salesforce, Litify, Filevine, and many more. No technology implementation is required, just a few clicks and you are all set.

Your competitive advantage

With increased accuracy and better outcomes with AI technology, you can find ways to win your case over the competition. Save time, get greater Insights, and negotiate better.

*LLM = Large Language Model = a type of artificial intelligence (AI) algorithm trained on vast amounts of data to understand and process human language
